

Sapta Nadi Chakra

<i>Nadi</i>	<i>Prachand</i>	<i>Pawan</i>	<i>Dahan</i>	<i>Soumya</i>	<i>Neera</i>	<i>Jala</i>	<i>Amrita</i>
Ruler	Saturn	Sun	Mars	Jupiter	Venus	Mercury	Moon
Nature	Fierce	Windy	Hot	Weather changes	Good rains	Better rains	Best rains
Nk No	3	4	5	6	7	8	9
Nk	Krittika	Rohini	Mrigashira	Ardra	Punarvasu	Pushya	Ashlesha
Nk No	16	15	14	13	12	11	10
Nk	Vishakha	Swati	Chitta	Hastha	Uttara	Pubba	Makha
Nk No	17	18	19	20	21	22	23
Nk	Anuradha	Jyeshtha	Moola	P. Ashadha	U. Ashadha	Abhijit	Sravana
Nk No	2	1	28	27	26	25	24
Nk	Bharani	Ashvini	Revati	U. Bhadra	P. bhadra	Shatabhisha	Dhanishta

1. **Soumya Nadi** is also known as Madhya Nadi
2. **Prachand, Pawan and Dahan:** also known as YamyaNadis or DakshinaNadis
3. **Neera, Jal and Amrit:** also known as UttaraNadis
4. **Amrit** is also known as Sheetal

Some Important Principles:

1. When many planets are in a single rashi, esp in one nakshatra with Mars and Sun joining them and Mars is with Rahu, there can be terrible downpour, even if it is not rainy season
2. If Moon joins Venus or in Trikona, weather fluctuation takes place; in rainy season, good rains, unless preventing factors are present
3. Transit of Mars from one rashi to another, perceptible change in weather within 2 days; if in rainy season, good rainfall. **Mars is the most powerful planet causing rainfall.**
4. if a major planet changes rashi, noticeable change in weather.
5. When planets retrograde or become direct, change in temperature, humidity. **Mercury important planet to notice. Venus** alone, either retro or direct, cannot influence weather
6. If strong Moon is aspected by the dispositor, rains
7. More benefics in DakshinaNadi: rains; more malefics in UttaraNadi: no rains
8. Cloud formation when Mercury and Venus, Mercury and Jupiter and Venus-Jupiter are together. In favourable rashi and favourable aspects, rains occur.
9. Venus behind slow moving planet causes wind. Many planets in Pawannadi: destructive nadi

Factors preventing Rains

1. Sun in between Venus and Mercury, dry spell for a few days; a break in rains
2. Jupiter-Mars within 30 degrees, prevents rain
3. If Mars is ahead of Sun in rainy season: worst combination.

Ardra Pravesha Chakra

Monsoon rains start in N India when Sun enters ArdraNakshatra. Horoscope cast for that time gives us information about the rains that take place in that year. Delhi is taken as point of reference; some astrologers opine that Varanasi should be considered. Monsoon continues till Sun enters Swati.

Role of Rashis

Twelve rashis have been divided in to following categories on the basis of water content:

1. Fiery: Aries 25%, Leo 0% and Sagittarius 50%
2. Earthy: Taurus 50%, Virgo 0%, and Capricorn 100%
3. Airy: Gemini 0%, Libra 25%, Aquarius 50%
4. Cancer 100%, Scorpio 25%, Pisces 100%

Moon, Venus, Mercury and Jupiter gives plenty of rain while, malefic planets Sun, Mars and Saturn are dry, preventing rain.

Directions and Places in the Horoscope

Lagna is always East; 10th house South; 7th West and 4th North

1. **East:** Bengal, Bihar, Jharkhand, Mizoram, eastern MP
2. **North East:** 2nd and 3rd houses: Bhutan, Assam, Meghalaya, Arunachal Pradesh, Nagaland, Manipur, Sikkim
3. **North:** 4th house: Delhi, Punjab, Haryana, HP, UP, Nepal, Parts of J & K, Tibet, Uttaranchal
4. **North West:** 5th and 6th houses: Baluchistan, Rawalpindi, Peshawar, Afghanistan
5. **West:** 7th house: Gujarat, Rajasthan, Maharashtra, western part of MP, Sindh, West Punjab, Multan, Daman and Diu
6. **South West:** 8th and 9th houses: Kerala, Karnataka, Maharashtra, West coast and Goa
7. **South:** 10th house: TN< parts of AP, Pondicherry
8. **South East:** 11th and 12th houses: Orissa, parts of West Bengal, parts of Andhra, East Coast, Andaman and Nicobar

Role of Sun and Mars: If together, they become intensely dry. Also if Sun is behind Mars, no rains

Sun and Saturn: Together in one rashi: in summer, intense heat; in winter, severe cold

Saturn is karaka for wind and dryness. Strong wind and storms are caused.

If in **airy nadi**, drives away clouds.

In **watery nadi**, storms and rain; if aspected or with watery planets, more so

Date of rains

1. Entry of Sun to Mrigashira, southwest monsoon strikes the coast of Kerala
2. Sun's entry in to Kanya, beginning of withdrawal from North
3. Sun's entry in to Hastha, rains in Bihar
4. Some occasional rains when Sun enters Chitra or it may mean withdrawal of SW monsoon

Kurma Chakra

Kurma (tortoise) Chakra is used to find the places and directions of malefic or benefic events with in a country:

1. Central: U.P. M.P., Rajasthan, Haryana
2. East: Bihar, Orissa, Bengal, Assam etc.
3. South-East: Tripura, Orissa, Chhattisgarh, Andhra Pradesh
4. South: Kerala, Tamil Nadu, Karnataka, Andhra Pradesh
5. South-West: Goa, Maharashtra, Gujarat
6. West: Maharashtra, Gujarat, Punjab, Rajasthan
7. North-West: Kashmir, Himachal Pradesh, Uttaranchal Pradesh
8. North: Kashmir, (Nepal), Uttaranchal Pradesh
9. North-East: Sikkim, (Bhutan), Assam, Arunachal
