

Market Prediction:

Planets = Volume

Bullish Planets: Jupiter & Rahu

Bearish Planets: Mars & Saturn and Retro Planets (Except Rahu & Ketu)

Side ways Planets: Sun, Moon, Mercury, Venus, Ketu

Houses = Trend

Bullish Houses: 1,3,6,10,11 (Upachaya)

Bearish Houses: 5,8,12

Side Ways Houses: 4 & 7

Angle Houses: 2 & 9

Key Planets:

1. Moon remains in 1 Star for a day therefore Moon indicates the Day movement in Market
2. Sun moves 1 degree per day and remains for 13 days in a Star therefore 13 or 14 days movement in Market. (7 days by the X Planet of Sun and 45 days Y Planet of Sun).
3. Jupiter remains for 90 days in one Star there fore Jupiter signals 90 days Movement in the Market (45 days by the X Planet of Jupiter and 45 days Y Planet of Jupiter).

What are X and Y Planets?

X - Planet is Star Lord of the Key Planet that is Moon or Sun or Jupiter

Y - Planet is the Star Lord of the X Planet

X1 or **Y1** Planet is the **Planet** which shares or also in the star of X or Y and it could be more than one planet like X1, X2, X3 (if 1 Planet X1, if 2 Planets then X1 & X2)

For Example:

Moon (the Key Planet) is in the Star of Jupiter which becomes X (X = JUP)

and Jupiter is in the Star of Rahu which becomes Y (Y = RAHU)

and Neptune is also in the Star of Rahu which becomes Y1 (Y1= NEPTUNE)

when there is X1 or Y1 in X or Y of Key Planets X or Y Loose their Power and X1 or Y1 gains the Power.

In example Y1 = Neptune there fore Rahu will loose the Power and Y1=Neptune will take the power.

Note: To find the House Number of X1 or Y1, we have to count the House Number from X1 or Y1 Planet to the Key Planet and not from the Key planet to the X1 or Y1.

Financial Astrology Rules

Rule 1. Day Lord

1. Any planet comes as Day Lord in the X & Y of Moon then that day the Market will remain Bullish.
(Even if the Planet is bearish or retro or in the bearish houses the market will be bullish)

Note: If there is X1 or Y1 then the bullishness will not be there and we have to consider the X1 & Y1 result.

Example:

On 21 April 2021 Mercury was the Day Lord and also the X of the Key Planet Moon & Ketu was the Y Planet the SENSEX gained 855.30 Points from the previous close.

In a Year about 30 days will come as Day Lord of X or Y (On these days you can buy Nifty derivatives call option and make money and come out)

Rule 2. Moon Day Rule

1. If Moon becomes X or Y of the Key Planet Moon then that day will also be Bullish day.
For Ex: 1. Moon's X = Moon and Y = Moon, Ex. 2. Moon's X = Ven and Y = Moon. This is considered as Moon Day as Moon is coming as X or Y.

Moon will be in its own stars Rohini, Hasta, Sravana that is own stars for 3 days respectively every month and that gives us **36 days in a Year when the Market is going to be Bullish.**

If Rule 1 and rule 2 both come into effect, then there will high bullish day.
(but if there are many other planets sharing the Moon Star then the bullishness may reduce and will become less bullish day.)

Rule 1 and Rule 2, together will give about 50 days in a year or 4 days in a month which should be enough for a trader to make money.

For Example:

On 25 April 2021 The Key Planet Moon was in the Star of Moon which is X of the Key Planet. Such day will also become Bullish.

On 13 May 2021 The Key Planet Moon was in the Star of Moon but many other planets were also sharing the Moon Star there for on that day bullishness may not work.

Rule 3. Star Lord exchange Rule (Nakshatra Parivartana)

1. Star Exchange Means X & Y of the Key Planet exchange Stars and we do not need to see the Houses and even if we see the houses they will be mostly Positive or bullish.

One can do BTST buy previous day and sell on the Nakshatra Exchange Day at the opening 1 hour of the market and make money.

Note: If there is X1 or Y1 then the bullishness will not be there and we have to consider the X1 & Y1 result.

For Example:

Ex-1. Y only Exchanging the Star with X

On 02-Mar-2022 Moon's X=Rahu Y=Sun (Sun is in Rahu Star) where Moon's X and Y are exchanging their Stars.

Ex-2. Directly Moon exchanging the Star

On 20 April 2021 The Key Planet Moon's X = Sat and Y = Moon, X & Y are in each other Stars therefore the market should be bullish. (20 April 2021 was Sunday therefore no market.)

Nakshatra Parivartana will occur for about 20 days in a year or 2 days in a month

Rule 4. Stellar Rule (Nakshatra Rule)

1. Stellar Rule or Nakshatra Rule means X & Y of the Key Planet there may be other planets also in the stars of the X or Y. When you find other planets in the Star of X then these planets are to denoted as X1, X2, X3 likewise and the counting of house is to be done from the X1 planet to the Key Planet Moon.
2. The X1, X2, X3 planets will gain more power to give result of the house counted than the X or Y Planet.

Note: Stellar Rule is the most strongest rule as it diminishes the above three rules. (Day Lord Rule, Moon Day Rule, Nakshatra exchange Rule)

Rule 5. Planet in own Star

1. In the X or Y of the Key Planet, there may be X or Y in their own star. When X or Y is in their own star such planet gives results as Key Planet and we need to treat them as Key planet and count the houses from the Key planet to Moon.

Ex-1.

On Jan-8 2026 The Key Planet Moon's X = Ve and Y = Ve, (When X or Y are in own Stars the Planet will work as Key Planet) here Venus will work as Key Planet both as X & as Y

Considering Venus as Key Planet counting Stars from Venus

X1=Ke (8), X2=Moon (8), X3 = Me(12), X4=Su(12) X5 = Ma(12)

Y1=Ke (8), Y2= Moon (8), Y3=Me(12), Y4=Su(12), Y5=Ma(12)

Market remained downward the whole day Sensex 600 points down

Ex-2.

On Jan-9 2026 The Key Planet Moon's $X = \text{Sun}$ and $Y = \text{Ve}$, (When X or Y are in own Stars the Planet will work as Key Planet) here Venus will work as Key Planet.

Considering Venus as Key Planet counting Stars from Venus

$Y1 = \text{Ke}$ (8), $Y2 = \text{Moon}$ (9), $Y3 = \text{Me}$ (12), $Y4 = \text{Su}$ (12), $Y5 = \text{Ma}$ (12)

Market remained downward the whole day Sensex 500 points down
